MAXIMO GARAPA

Modern Warmth with Tropical Strength

The elegance of a golden tone, the trust of a high-performance hardwood. Maximo Garapa brings you the natural light your project deserves – and the strength to keep it shining.

Naturally Built to Last

Maximo Hardwood is grown, not engineered. Sourced from well-managed forests and milled for performance, it's real wood – with real longevity.

- Sustainably sourced
- Precision-milled for clean installs
- Rich tone and evolving grain
- Cooler underfoot than composites

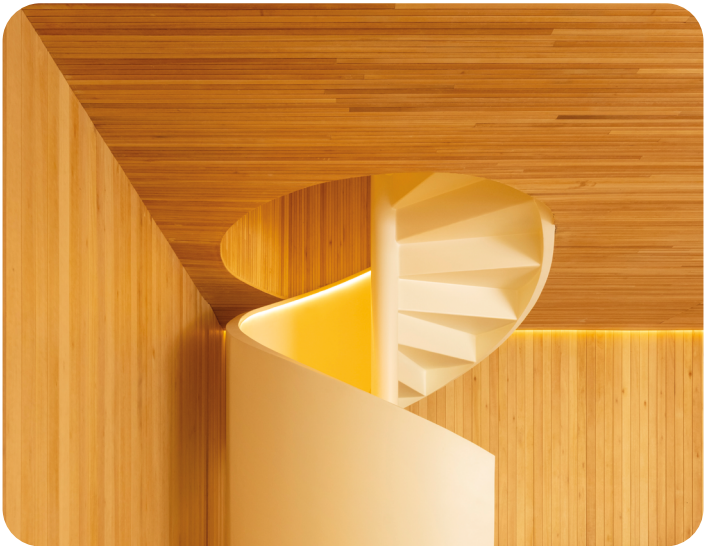

Top Features

- Very durable hardwood
- Smooth and consistent grain for a refined look
- Clean, golden yellow tone that ages gracefully
- Medium density with predictable stability
- Ideal for contemporary outdoor architecture

Lineup

Every dimension is available in random lengths ranging from 8 feet to 22 feet.

	PROFILE	NOMINAL SIZE	NET SIZE	APPLICATIONS
	Square	1 x 6	3/4" x 5 1/2"	Decking
	Square	5/4 x 6	1" x 5 1/2"	Decking
	Pre-grooved	1 x 6	3/4" x 5 1/2"	Decking
	Pre-grooved	5/4 x 6	1" x 5 1/2"	Decking

Technical Data & Care

SPECIES	Garapa (Apuleia leiocarpa)
DURABILITY	Class 1, very durable
FIRE RATING	Class A Fire Rating (ASTM E84)
DENSITY	-0.79 specific gravity
JANKA HARDNESS	1,700 pounds
SUSTAINABILITY	Sourced from responsibly managed tropical forests; an eco-friendly hardwood option
HANDLING	Store Maximo Hardwood boards off the ground, stacked evenly, and covered with a breathable tarp. Keep tarp edges open to avoid trapped moisture. Avoid direct sun, rain, and moisture exposure.
INSTALLATION	Maximo Hardwood decking installs using hidden fasteners or stainless steel face screws. Pre-drill to avoid splitting, and always use stainless steel hardware to prevent staining or corrosion. Boards should be spaced to allow for airflow and drainage. Refer to the Maximo Installation Guide for complete instructions and best practices.
FINISHING & COATING	Protective finishes may be applied depending on desired aesthetic. Compatible with most oil-based and water-based coatings. For best results, consult your coating supplier.
WEATHER EXPOSURE	Garapa naturally weathers to a silver-gray patina over time. To retain the original warm brown tone, apply UV-protective oil treatments regularly.
