

MAXIMOTM

HARDWOOD

IPE

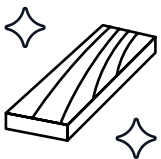

PRODUCT SHEET

Wood, built to last. That's Maximo Hardwood.

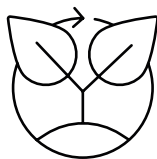

Engineered by nature and refined through precision milling, Maximo Ipe stands at the top of outdoor hardwood performance. With extreme density, Class 1 durability, and natural resistance to insects and decay, it delivers unmatched longevity even in the harshest climates – no coatings, no plastic, no compromise.

Application

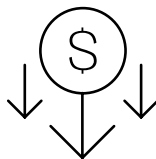

- Decking
- Boardwalks
- High-traffic spaces
- Luxury outdoor structures

MAXIMO IPE

Built for the World's Most Demanding Decks

The prestige of tropical hardwood, the assurance of performance. Maximo Ipê offers the rich color you admire – and the resilience you rely on.

Naturally Built to Last

Maximo Hardwood is grown, not engineered. Sourced from well-managed forests and milled for performance, it's real wood – with real longevity.

- Sustainably sourced
- Precision-milled for clean installs
- Rich tone and evolving grain
- Cooler underfoot than composites

Top Features

- Among the highest-density hardwoods in the world
- Durability Class 1 – very durable against fungi & termites
- Class A fire behavior (per species characteristics)
- Exceptional strength for heavy-duty applications
- Smooth surface with striking natural grain

Lineup

Every dimension is available in random lengths ranging from 4 feet to 22 feet.

	PROFILE	NOMINAL SIZE	NET SIZE	APPLICATIONS
	Square	1 x 4	3/4" x 3 1/2"	Decking
	Square	1 x 6	3/4" x 5 1/2"	Decking
	Square	1 x 8	3/4" x 7 1/4"	Decking
	Square	5/4 x 6	1" x 5 1/2"	Decking
	Square	2 x 4	1 1/2" x 3 1/2"	Structure / Fascia
	Square	2 x 6	1 1/2" x 5 1/2"	Structure / Fascia
	Square	2 x 8	1 1/2" x 7 1/4"	Structure / Fascia
	Pre-grooved	1 x 4	3/4" x 3 1/2"	Decking
	Pre-grooved	1 x 6	3/4" x 5 1/2"	Decking
	Pre-grooved	1 x 8	3/4" x 7 1/4"	Decking
	Pre-grooved	5/4 x 6	1" x 5 1/2"	Decking

Technical Data & Care

SPECIES	Ipe
DURABILITY	Class 1, very durable
FIRE RATING	Class A Fire Rating (ASTM E84)
DENSITY	-1.04 specific gravity
JANKA HARDNESS	3,680 lbf
SUSTAINABILITY	Sourced from responsibly managed tropical forests; an eco-friendly hardwood option
HANDLING	Store Maximo Hardwood boards off the ground, stacked evenly, and covered with a breathable tarp. Keep tarp edges open to avoid trapped moisture. Avoid direct sun, rain, and moisture exposure.
INSTALLATION	Maximo Hardwood decking installs using hidden fasteners or stainless steel face screws. Pre-drill to avoid splitting, and always use stainless steel hardware to prevent staining or corrosion. Boards should be spaced to allow for airflow and drainage. Refer to the Maximo Installation Guide for complete instructions and best practices.
FINISHING & COATING	Protective finishes may be applied depending on desired aesthetic. Compatible with most oil-based and water-based coatings. For best results, consult your coating supplier.
WEATHER EXPOSURE	Ipe naturally weathers to a silver-gray patina over time. To retain the original warm brown tone, apply UV-protective oil treatments regularly.
